

The Master of Bubbles!

Bubble Master

The Bubble Master is a professional and durable machine that is capable of introducing enormous quantities of bubbles into the atmosphere. The high-powered fans offer variable speed control and allow for greater flexibility when projecting bubbles. For further flexibility, the Bubble Master can be paired with our Swivel Bracket to maximize bubble distribution.

The easy to use one knob control or optional DMX control, makes operation simple and straightforward to achieve enormous bubble output. The Bubble Master is compatible with our fluid distribution system allowing for continuous use for rides and attractions. It is built with hi-tech, roto-mold plastic that makes it light weight, durable and prevents corrosion.

The Bubble Master can transform any wedding or dance party into a magical event. Additionally, the FDS compatibility allows for integration into amusement park attractions where daily continuous use is required.
